

RESUME

ZAW MIN TUN

**Grafton,
Auckland,
New Zealand**

Email : mg.zawmintun@gmail.com

▪

PERSONAL

Date of Birth	February 11
Gender	Male
Nationality	Myanmar
Communication Language Skills	Myanmar, English, French, Basic Chinese, Basic Japanese
Site	https://profile.zawmintun.space/
Quick info	I'm currently holding a student visa and allowed to work 20 hours per week. I am eligible to apply for a post-study work visa in November, 2026.
Phone	+64 224 757 975

EDUCATION

Bachelor of Computer Science (University of Computer Studies, Mandalay)
Master of Computer Science (University of Computer Studies, Mandalay)
Master of Software Engineering (**Attending** at Yoobee College, Auckland)

OTHER QUALIFICATION

OCA (Oracle[®] Certified Associate, Java SE 8 Programmer)
MCTS (Microsoft[®] Certified Technical Specialist)
MCPD (Microsoft[®] Certified Professional Developer)
Certificate of 'Instant Test Driven Development with Java, Junit and Mockito'
(Udemy)
Certificate of 'Learn Test Driven Development in Java' (Udemy)

SKILLS

More than 20 years experience in software development. Technical topics that I have experience with are listed:

Programming languages
C/C++ , C#/WPF, Java, Python
Web development
Javascript and frameworks (AngularJS, ReactJS, NodeJS) ASP / ASP.Net , PHP HTML, CSS, Ajax, jQuery
Database & data-related tools
MS SQL, MySQL DB2, Oracle, MongoDB, PostgreSQL, SQLite JSON, XML, XSLT
OS and servers
Windows, Apple, Android, Linux IIS, JBoss, Apache, Django, FastAPI, GraphQL ActiveMQ, IBM MQ
Others
MS Azure, AWS Virtual Box, Virtual Machine, Docker Git JUnit, PyTest, TDD

WORKING EXPERIENCE

Below is the list of the organizations I worked for, the positions I held and other necessary information.

1. Software Engineer

Organization: Merry Electronics (Singapore) Pte. Ltd.

Location: Singapore

Time period: 2022 April – 2025 October

2. System Analyst

Organization: Amadeus GDS Pte Ltd (UFIS Airport Solutions Pte Ltd)

Location: Singapore

Time period: 2012 October – 2020 December

3. Software Developer

Organization: IFIS Asia Pte Ltd

Location: Singapore

Time period: 2009 October – 2012 April

4. Monitoring and Evaluation Consultant

Organization: United Nations (World Food Programme)

Location: Vientiane, Lao PDR

Time period: 2008 December – 2009 March

5. System Programmer

Company: CKT Thomas Pte Ltd

Location: Singapore

Time period: 2006 November – 2008 November

6. Senior Programmer

Company: M.Y Associates Pte Ltd

Location: Myanmar

Time period: 2004 August – 2006 November

PROJECTS INVOLVED

1. Peer-to-peer Car Rental System	
Organization Name	Academic project at Yoobee College
Technologies	Azure Static App, ReactJS, Python, Azure SQL
Description	A web application for car renting among peers. A user can submit the cars as the owner to rent, or a user can rent the cars. A team running a car rental service is also laid out in the design.
Role	Design, Development, DevOps

2. SmartDesk - Reading web application	
Organization Name	Academic project at Yoobee College
Technologies	AWS, React Typescript, Python, PostgreSQL (AWS RDS)

Description	A website to help the user in reading and organising what he reads. Vocabulary and flashcards will be automatically generated based on the contents that the user reads. Recommendations will be provided timely based on the user's ongoing reading.
Role	Design, Development, DevOps

3. LabJOMS	
Organization Name	HauHau Research
Technologies	PHP (Laravel), PostgreSQL, Apache, AWS (EC2)
Description	A website to manage and organise a laboratory about booking the facilities, purchase requests, reimbursements, and risk assessments while tracking the necessary related data such as materials, laboratories, users, roles, certificates, etc.
Role	Design, Development, DevOps

4. Project Management System	
Organization Name	Merry Electronics Pte Ltd
Team Size (Dev)	5+
Technologies	C# / WPF, Postgres, AWS / MongoDB / GraphQL / FastAPI
Description	An application to help in managing the projects of the organization including the administrative activities such as creating the corresponding information (e.g. projects, customers, users, membership) and the operational activities (e.g. defining the requirements, updating the requirements, releasing the information, planning the quality assurance, and executing tests).
Role	Developer
Responsibility	- Requirement analysis and development - Production & maintenance support

5. Airport Management System	
Organization Name	Amadeus GDS Pte Ltd
Team Size (Dev)	10+
Technologies	C++, Java, AngularJS, Oracle, C#/WPF
Description	A suite of applications to help the users in managing the fixed and human resources, such as planning the staff roster for the seasons, planning the tasks in advance for the flights, and allocating the resources like check-in counters, belts to flights.
Role	Developer
Responsibility	- Discussion and analysis on requirements with the functional and business analysts - Implementation - Production & maintenance support

6. Stock Filter	
Organization Name	IFIS Asia Pte Ltd
Team Size	5
Technologies	C#, ASP.Net, JavaScript MS SQL Server 2000
Description	A web application together with a set of Windows services to download the stock and market data from Thompson Reuters. All data are in XML format and then parsed into the database for use. Web site administrators can handle (add/remove/update) the report formats to show the data as needed. The users can view the market data filtering by the criteria (e.g. Market, Market Capital, EPS) as provided by the administrator.
Role	Developer

Responsibility	- Requirements collection & analysis - Discussion and meeting with clients - Implementation - Conducting in SIT and UAT - Going live and production support
----------------	---

7. RKD Fundamental	
Company Name	IFIS Asia Pte Ltd
Team Size	5
Technologies	C#, ASP.Net XSLT
Description	Market data are retrieved from Reuters data source (RKD) and shown for the viewers searching for fundamental information of an organization such as Snapshot history, financial ratios.
Role	Developer
Responsibility	- Requirements collection & analysis - Discussion and meeting with clients - Implementation - Conducting in SIT, UAT - Going live and production support

8. Monitoring and evaluation web-based data system	
Company Name	United Nations World Food Programme
Team Size	5
Period	3 months
Technologies	PHP (PRADO Framework), MySQL, MySQL Front

Description	The web-based system for monitoring and evaluating information. The project is for processing the data tracking the movement of the activities of the United Nations World Food Programme in the purpose of evaluation of the activities. The data from the WFP activities all over the country are submitted and saved in the system and then processed through the system to produce the reports for a required time frame to be checked by the various levels of the organization or the donors.
Role	Consultant
Responsibility	- Requirement analysis - Consultation for application design, data entry UI design and development - Training & Presentation

9. CKT ERP	
Company Name	CKT Thomas Pte Ltd M.Y Associates Pte Ltd
Team Size	5
Technologies	ASP, VB6 JavaScript, VBScript MS SQL Server 2005
Description	The web-based ERP system was designed and implemented to mainly streamline the process flow of the construction companies. The system includes the usual processes of the construction companies such as simple purchasing, contractual purchasing, managing invoices, tracking payments and reporting modules.
Role	Developer
Responsibility	- Requirement collection - Discussion and meeting with the departments regarding to the requirement details and process flow - Testing - Going live, support and maintenance

10. CKT Cinema 4D Plugins	
Company Name	CKT Thomas Pte Ltd M.Y Associates Pte Ltd
Team Size	5
Technologies	C++ (Cinema 4D API)
Description	A suite of plug-in / extensions to use in Cinema 4D applications which will help the user in drawing the buildings in 3D diagrams based on which the cost estimation will be calculated and generated as an formatted MS Excel file.
Role	Developer
Responsibility	- Requirement collection - Discussion and meeting with the engineers who used the suite for cost estimation
